

Solution-Focused Guided Imagery

- 📍 Coping
- 🕒 40-45min.
- 👤 You

Tool Description

Instructions

In the following exercise you will be asked to close your eyes and vividly imagine yourself thinking, feeling, and behaving in ways that would demonstrate that you were resolving your problems. This exercise will consist of several steps. On completing each step, you will be asked to write what you had imagined. When asked to identify specific things or actions that you would be doing, I would like you to respond in concrete, observable, and detailed behaviours. That is, rather than saying “I will be friendly,” describe the behaviours you will be demonstrating to be friendly such as: “I will be smiling, saying hello, and shaking hands.” Moreover, always construct an image/picture of a behavioural action on your part. Do not describe things that you would not be doing (e.g., “I will not frown or grimace”).

Step 1: Identifying a recurring problem

Identify a recent recurring problem that you would like to overcome:

- a. something you would like to do
- b. something you want to stop doing or
- c. something you want to avoid doing

Write down a recent recurring problem that you would like to overcome:

Rate the severity of this problem from 0 (non-existent) - 10 (extremely high):

Scaled Score:

Step 2: Describing the problem

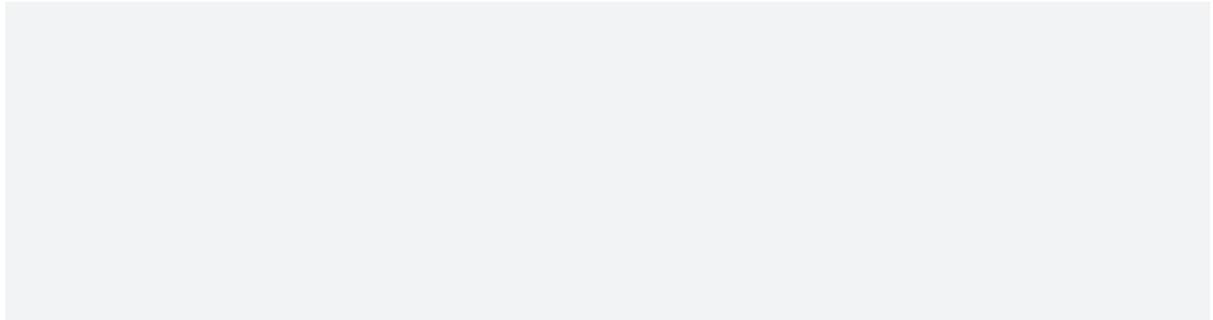

- a. If your problem is something you would like to do, describe it below as if it were a video of what you would observe yourself doing behaviourally. (Do not describe what you would not be doing.)
- b. If your problem is something you want to stop doing, describe it below as if it were a video of what you would observe yourself start doing behaviourally instead. (Do not describe what you would not be doing.)
- c. If your problem is something you don't want to do, describe it below as if it were a video of what you would observe yourself doing behaviourally instead. (Do not describe what you would not be doing.)

Step 3:

Suppose a miracle happened tonight while you were sleeping, and this miracle solved your problem and since you were sleeping you didn't know this miracle had occurred, and when you woke up you realized that you no longer had this problem. What would be the first small sign (specific observable behaviour) that would show you were doing something different the next day? Construct an image/picture of a behavioural action on your part. Do not describe something you would not be doing.

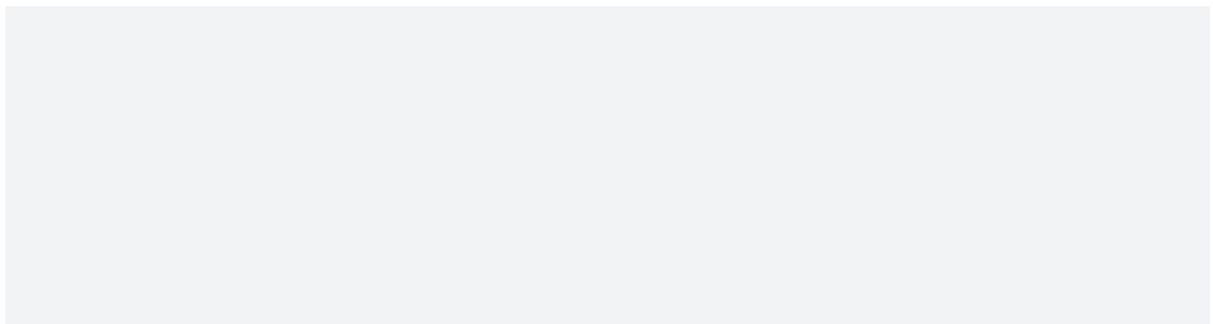

Step 4:

Identify who would notice this different thing you would be doing and describe how you imagine they would act when they notice this different behaviour? Construct an image/picture of a behavioural action on their part. Do not describe something they would not be doing.

A large, empty rectangular box with a light gray background, intended for the user to draw or write their response to Step 4.

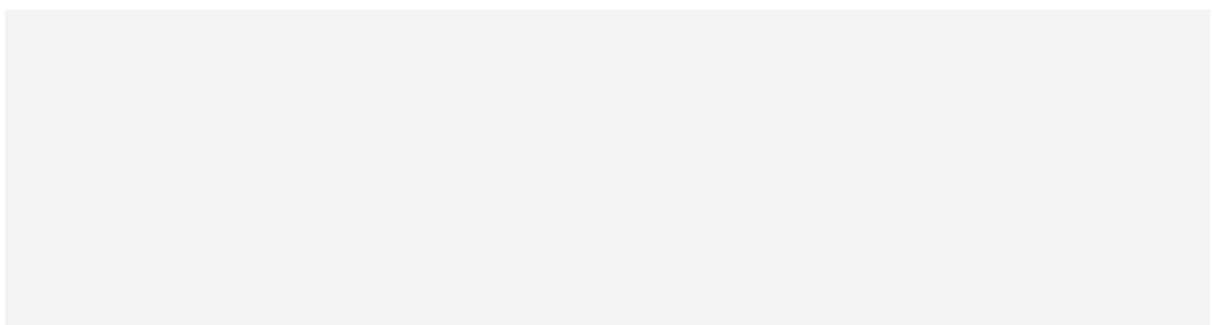

Step 5:

Indicate what you would do (specific observable behaviour) in reply to the person's response described above.

A large, empty rectangular box with a light gray background, intended for the user to draw or write their response to Step 5.

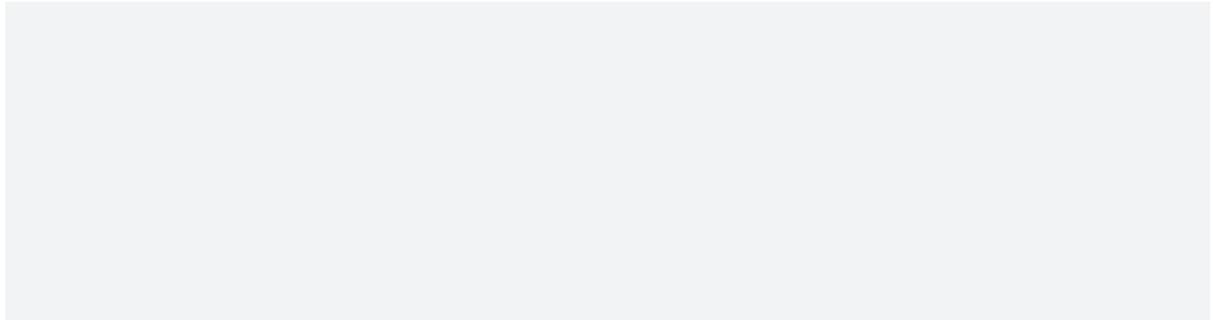

Step 6:

What else would you notice that you would be doing (specific observable behaviour) differently after this miracle occurred? Construct an image/picture of a behavioural action on your part. Do not describe something you would not be doing.

A large, empty rectangular box with a light gray background, intended for the user to draw or write their response to Step 6.

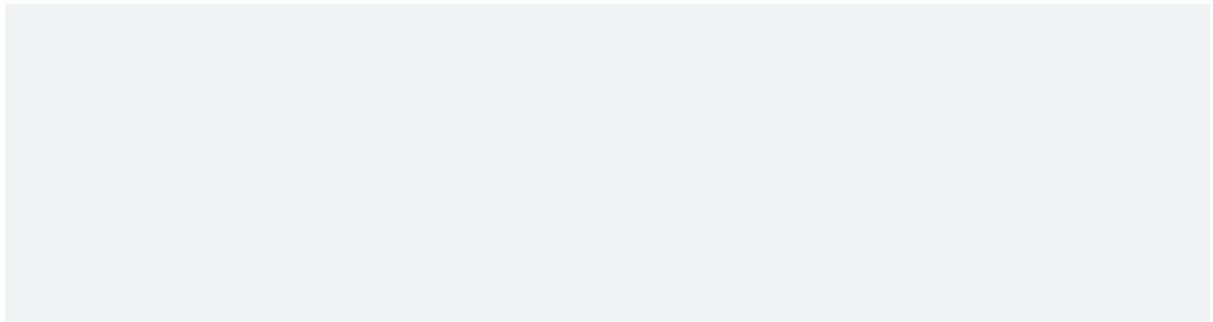

Step 7:

Identify who else would notice this different thing you would be doing and describe how you imagine they would act when they notice this different behaviour? Construct an image/picture of a behavioural action on their part. Do not describe something they would not be doing.

A large, empty rectangular box with a light gray background, intended for writing the response to Step 7.

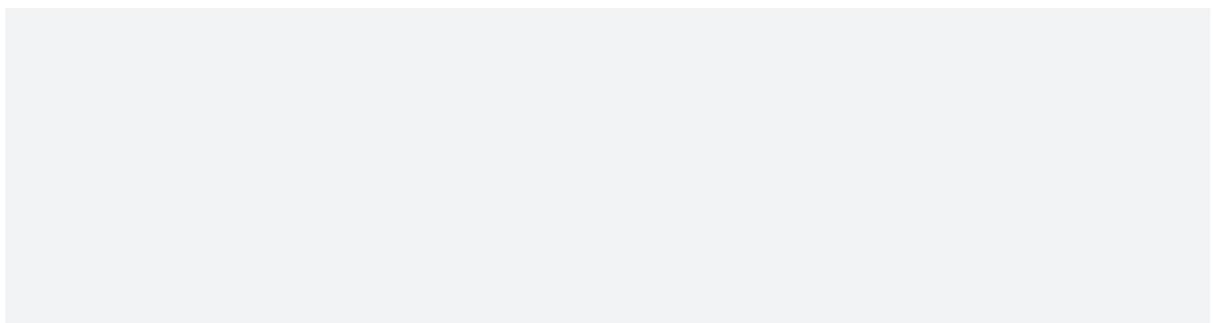

Step 8:

Indicate what you would do in reply to the person's response described above. Construct an image of a behavioural action on your part. Do not describe something you would not be doing.

A large, empty rectangular box with a light gray background, intended for writing the response to Step 8.

Step 9:

Describe a time when some of this miracle has already happened, even if only a little bit, during problematic times.

A large, empty rectangular box with a light gray background, intended for writing the response to Step 9.

Step 10:

How did you make this part of your miracle happen during this problematic time? Things you thought or did differently—commitments you made—new behaviour you tried, etc.

Step 11:

Recall your thoughts about how pleased you were with your efforts at the time.

Step 12:

On a scale of 0 to 10 with 0 representing the non-existence of this problem and 10 being the worst this problem has ever been and, where do you think you are right now on the scale?

Scaled Score:

Step 13:

Describe how you have gotten yourself to that number? Construct an image of a behavioural action on your part. Do not describe something you would not be doing.

Step 14:

When you are one number lower, what will you and others see you doing (specific observable behaviour) differently that you're not doing now? Do not describe something you would not be doing.

Step 15:

Write yourself a short note describing what you discovered or rediscovered about yourself and your situation. You can use the back of this sheet if needed. Rate the severity of this problem from 0 (non-existent) - 10 (extremely high):

Scaled Score:

Short note:
